

Monitoring & Control Accessories: Locks

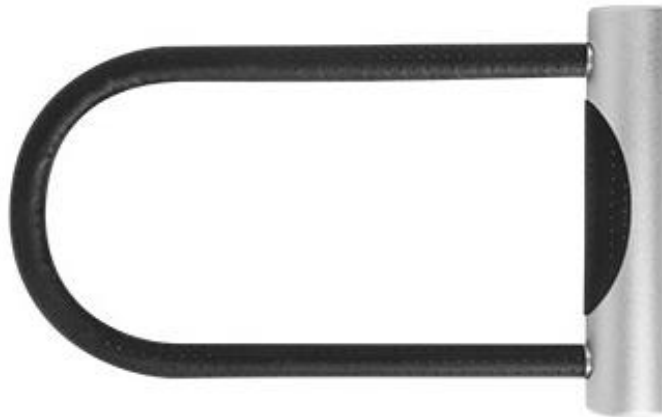

LCK-1041 – Nokē U-Lock

Description:

- The new Nokē U-Lock, expected to start shipping in October 2016.
- Designed with style in mind.
- With smooth surfaces and soft edges, it feels great in your hand and looks better on your bike.
- It's simple yet deliberate, minimal yet striking. It's a rare combination of brains and beauty.

Application:

- Will also stand up to threatening intruders.
- When a potential thief shakes your Nokē for more than three seconds or enters an incorrect quick-click code more than four times, a shrieking alarm will sound, sending the intruder running and drawing the attention of anyone within about 50 meters. Yes—it's that loud.
- Just like the alarm on your car, you can choose to arm the Nokē when you want it or disarm the alarm if break-ins are less of a concern to you.
- A custom designed bike mount is included with the U-Lock.

Specifications:

Size	11.5"x6.85"x1.2" / 55mm x 84mm x 30.5mm 3lb / 1.36kg
