

## intouch™ Easy Connect Monitoring & Control Accessories: Monnit Sensor Products:

The **Monnit** product line of Wi-Fi enabled sensors allow you to monitor the status of your most important assets in real-time for peace of mind, and collect historical information useful for improving the efficiency and profitability of your operation.

All sensors are AA battery powered with alerts to notify you when they need to be replaced. Battery backup also holds readings in the event of Wi-Fi signal disruption for upload when the signal is restored. Sensors are low power with long life and have proven quality and reliability for commercial operations.

If you don't see the sensor you need, just ask. Not all sensors available are listed below.

### All Sensors include:

- SMS text or email alerts
- iMonnit basic monitoring free of charge. Users may upgrade to iMonnit Premiere for a yearly subscription fee, for additional features.
- Downloadable data.
- Sensor data storage if wireless signal is temporarily disrupted
- AA battery power, with alerts to notify you when they need to be replaced.

### iMonnit Basic versus iMonnit Premiere

free	\$39 USD yearly subscription
2 hr heartbeat check-in	10 minute heartbeat check-in
45 day historical data storage	Unlimited historical data storage
1 network	20 networks
1 user	Unlimited users
Log up to 50 readings on Wi-Fi disruption	Log up to 50,000 readings on Wi-Fi disruption
	Advanced sensor configurations
	Sensor mapping tool

## 1104 – MoWi Programming Cable

### Description:

- USB programming cable for connecting MoWi sensors to your PC
- Reusable for multiple sensors

### Application:

- Initial configuration of the MoWi sensor for Wi-Fi and security using the programming utility
