

Monitoring & Control Accessories: Locks

LCK-1036 – Nokē Padlock. No Key, No Problem

Description:

- The original Nokē padlock.
- Connect, Manage, Share. Nokē (“no-key”) was designed to be the simplest electronic device you own.
- Weather-resistant and boron-hardened steel strong with the latest in anti-shim technology, for peace of mind.

Application:

- Automatically finds and connects to your Bluetooth enabled smartphone for quick and easy access to your secured items.
- The Nokē app makes it easy to manage up to 20 locks.
- Name your locks and create custom settings specific to each Nokē.
- Easily share and revoke access to your locked items.
- Specify the day time, location and duration of access.
- The history tab lets you monitor where when and by whom your locks were accessed.
- You can even set up a custom quick click code for access when you leave your phone behind.
